

Do you have a "mini-studio" in your school? Would you like to have a cyclorama, but can't afford a \$3000 professional model?

You can purchase a muslin Cyc and track for about \$350.

At Middlebrook Middle School we installed a 10' x 26' two-wall system.

It runs on a light-weight, aluminum track that's attached to a standard drop ceiling. You have to drill through the track and into the ceiling grid, or go right through the ceiling tiles as long as you back the tile up with squares of plywood to spread the load. (We used both methods.)

The muslin is simply clipped to a roller that rides in the track.
